

Buy Box Export

The product export contains a summary of the listings currently being monitored in Pricebox.

Product exports contain the following headers:

- source
- id
- name
- rangestart
- rangeend
- Buy Box time
- price
- high
- low
- stock
- merchant
- merchant_id
- prime
- subscribe
- pantry
- lowmap
- highmap
- mapviolation
- sellers
- rankcategory1
- rankcategory2
- rankcategory3
- rankcategory4
- rankvalue1
- rankvalue2
- rankvalue3
- rankvalue4

In addition to these columns, any custom fields set by the user will appear after the *name* column.

Source

A string value indicating the retail data source such as “amazon”, “walmart”, etc.

ID

The listing ID specific to the particular data source. For example, if the product is on Amazon the ID would correspond to the ASIN.

Name

The full name of the listing.

Range Start

The starting date for this export.

Range End
